

VELUDURTHI SIVA MOHAN BABU

Hyderabad, India | +91 [Your Number] | siva.veludurthi@email.com
LinkedIn: linkedin.com/in/sivaveludurthi | Technical Coach & R&D Specialist

PROFESSIONAL SUMMARY

Dedicated R&D Specialist and Technical Mentor with extensive experience in systems biology, metabolic modeling, and translational science. Expert in integrating multi-omics data (microbiome, metabolome, proteome) to develop predictive models for healthy aging and nutritional impact. Proven track record in bridging academic research and corporate R&D to drive disruptive health propositions.

CORE COMPETENCIES

Systems Biology:	Multi-omics integration, Epigenetic & Metabolomic patterning, Flux balance analysis.
Computational Tools:	Python (Data Science), Predictive Modeling, R, SQL, Bio-informatics pipelines.
Domain Expertise:	Microbiome-Metabolome interaction, Aging Biomarkers, Healthy Longevity, Biochemistry.
Soft Skills:	Stakeholder Management, Interdisciplinary Collaboration, Scientific Communication.

PROFESSIONAL EXPERIENCE

R&D Specialist (Systems Biology of Aging) 2019 – Present

Advanced Life Sciences Division

- Analyzed and interpreted the effects of diet and nutrition on biomarkers of aging and the microbiome to predict organ systems decline.
- Integrated large-scale omics data using systems biology approaches to identify individuals at risk for accelerated biological aging.
- Developed predictive models correlating nutritional intake with microbiome-metabolome patterns to forecast systemic health benefits.
- Collaborated with interdisciplinary teams to identify opportunities where nutrition modifies systems biology to benefit specific organ systems.
- Proposed disruptive interventional concepts involving biotics and bioactives to extend healthspan and prevent age-related diseases.

Technical Coach & Corporate Trainer 2014 – 2019

Siva Veludurthi TechCoach

- Mentored professionals in Data Science and Machine Learning, focusing on the application of Python in biological data interpretation.
- Developed curricula for complex technical topics, utilizing storytelling to bridge the gap between high-level science and technological execution.
- Managed stakeholder expectations across academic and industrial environments to ensure translational value in all training modules.

EDUCATION

PhD / MD-PhD in Biochemistry & Systems Biology 20XX

[University Name]

MBA in Finance (Online) 2025 – Present

Andhra University

KEY PROJECTS & RESEARCH

- **The AI Engineering Codex:** Developed RAG and Agentic AI workflows for automated scientific literature review in longevity research.
- **Microbiome-Host Mediation:** Investigated how microbial metabolites mediate systemic health benefits via circulating metabolites.
